# BESPOKE STRUCTURES

CopriSystems' bespoke sports structures use natural light and ventilation to create incredible spaces to play in year round.

Available in single spans up to 60m or any width in multiple connected spans, both with unlimited length. Our installations are suitable for a range of sports including Tennis, Badminton, 5-a-side Football, Basketball, Netball, Cricket, Horse Riding, Swimming Pools and many more. They're also ideal for multi-use sports halls.

We've been supplying a full service to schools and other organisations across the UK for 27 years, taking care of everything required to cover an existing area or constructing a new sports facility from scratch.

All our structures conform to the relevant building codes and we are SAPCA approved.

# FIXED COVERS

Our fixed covers provide a striking, modern appearance from both inside and out.

The covers translucent nature means the interior is flooded with natural light in the day, reducing the artificial lighting required, associated energy costs and carbon footprint.

The material - a PVC-coated polyester fabric is self-extinguishing and resistant to abrasions, UV damage and designed to last for more than 20 years.

Sidewall curtains can retract along the length of the walls to provide ample natural ventilation and an enhanced playing experience in warmer months.

Any height can be specified to accommodate a huge range of activities and structures can be joined together to create impressively large playing areas.

Natural light and ventilation

## TELESCOPIC COVERS

Providing the ultimate all-weather flexibility, our telescopic covers have been installed for a range of activities including swimming pools and tennis courts.

The covers are installed on steel rails and can be retracted electrically in under 1 minute.

Glulam frame structure supplied and installed on the continent.

## STEEL OR WOOD STRUCTURES

We offer hot-dipped galvanised steel or glulam wood frames.

Our wood structures help create an attractive, natural and warm environment. Wood is always sourced from sustainable forests, helping minimise their environmental impact.

Culford School

# PLAYING SURFACES

Whether you're looking to create a multi-sport or single use facility we offer a full turnkey service covering every aspect.

We've installed playing areas for Tennis, Badminton, Basketball, Football, Cricket, Swimming, Hockey, Horse-Riding as well as Multi Use Games Areas (MUGAs) and many other individual sports. Surface options include acrylic and polyurethane (PU), clay, carpet, grass and wood.

We can provide surfaces and fixed equipment to accommodate a wide range of activities

## ADDITIONAL FACILITIES & EQUIPMENT

To support the use of your new sports area we can incorporate other key facilities such as changing rooms, classrooms and viewing areas, built to your specification.

We can also supply additional equipment to easily transform the structure into a spacious event venue, such as heating.

Portchester School

## COUNTLESS OPTIONS

All our installations are bespoke and as such we can accommodate requirements unique to each client. Previous customisations have included steel clad walls to provide enhanced security as well as internal partitions and climbing walls.

Complete your sports facility with a pavilion designed to match your environment

## PAVILIONS

A covered sports pavilion is a great way to provide a place for people to get ready to play – or enjoy post-game drinks and discussion.

Exterior walls can include brick-effect, curtain walling, cedar board or steel cladding while period features such as pillars or porticos can also be incorporated.

Internally, it can be fitted out in any way you require, including flooring options such as carpet, vinyl, timber or laminate. You can also choose from a range of wall finishes and even incorporate extras such as a suspended ceiling.

## CASE STUDY

The Appeti Tennis academy based in Kent was set up by former Tennis Pro Eb Appeti, in partnership with Canterbury High School. It combines a unique curriculum and environment which allows the students to switch between coaching and academic work throughout the day, thus ensuring they can fulfil their sporting potential without impacting on their academic work.

Features of the CopriSystems structure include a tensile membrane cover allowing natural light to flood the courts and hard-wearing material side walls which can be retracted during warmer months to allow for maximum ventilation.

**“As a privately owned centre, cost was a big consideration as I was paying for the centre with my own money. We took a lot of time visiting many structures from air-supported to traditional builds. CopriSystems offered the best value for money with a great product. It is very well received by all that use it.”**

-Eb Appeti

# A FULL SERVICE

From start to finish we'll take care of everything with a full turnkey service that's been honed over 27 years.

**1 CONSULTATION**  
This crucial first stage of the process ensures we fully understand the needs of your organisation. It includes an in-depth survey of the site which results in a comprehensive list of requirements. We'll also discuss finance options, timescales and any planning considerations.

**2 DESIGN**  
Our bespoke approach allows us to design a unique structure that meets the needs of your organisation and overcomes any hurdles efficiently. Once design plans are finalised we can also assist you with any planning applications required.

**3 INSTALLATION**  
We place great importance on the quality of the installation and it's impact on our customers, ensuring not only a quick process but one with minimal disruption. We offer long term guarantees on our structures and a comprehensive support and maintenance service.
